Technical Skills

- Languages/Frontend: TypeScript, JavaScript, Python, Java, Angular, React, HTML5, CSS3, Tailwind CSS, Bootstrap
- Databases/Tools: PostgreSQL, MySQL, Git, GitHub, Agile/Scrum

Professional Experience

Front-End Developer Intern

National Autonomous University of Honduras (UNAH) | March 2026 – August 2026

- Contributed to the migration and modernization of the university's academic management system.
- Developed responsive user interfaces using Angular and TypeScript.
- Collaborated with university's developers and management to implement new features and improve usability.

Bilingual Technical Support Representative | Comcast/Xfinity Mobile Campaign

STARTEK | May 2023 – December 2023

- Delivered bilingual technical support for a Comcast/Xfinity Mobile account, resolving software, connectivity, and account issues.
- Documented solutions using ticket management systems while communicating clearly with English- and Spanish-speaking customers.

Projects

Inventory Management System

React | Python | PostgreSQL

- Developed the frontend of a web-based inventory management system for the Physics Department at UNAH.
- Integrated the React frontend with Python backend services.
- Delivered the application for institutional use and future maintenance.
