Professional Summary

Systems Engineer with experience in web application development and software quality assurance (QA), including Front-End development and test automation as a Junior SDET. Experienced in working with technologies such as Angular, React, Next.js, and TypeScript, as well as designing and executing automated tests using Playwright and the BDD (Behavior-Driven Development) approach. Knowledgeable in databases, Agile methodologies, and CI/CD processes. Additional background in technical support and bilingual customer service, with a B2 level of English proficiency.

Technical Skills

- **Programming Languages:** TypeScript, JavaScript, Python, Java
- **Web Development:** Angular, React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Databases and ORM:** PostgreSQL, MySQL, Neon, Drizzle ORM, SQL
- **QA and Test Automation:** BDD (Behavior-Driven Development), Playwright
- **Version Control and Agile Methodologies:** Git, GitHub, Jira, Agile/Scrum
- **Deployment and CI/CD:** Vercel, GitHub Actions

Professional Experience

Junior SDET (Software Development Engineer in Test) | *Under Control* | September 2026 – Present

- Design, develop, and execute automated tests using Playwright and the BDD (Behavior-Driven Development) approach.
- Develop web applications using Next.js and TypeScript, integrating PostgreSQL databases through Neon and Drizzle ORM.
- Configure and automate Continuous Integration and Continuous Deployment (CI/CD) workflows using GitHub Actions and Vercel.

Front-End Developer (Professional Internship) | *Executive Directorate of Technology Management (DEGT) - UNAH* | March 2026 – August 2026

- Designed and developed modern, interactive, and responsive user interfaces.
- Developed and implemented modular, reusable components, optimizing front-end performance and load times.
- Integrated and consumed REST APIs to manage and display large volumes of data.
- Coordinated and provided technical guidance to the Front-End team, including issue resolution and collaborative workflow management.

Bilingual Customer Service Representative | *STARTEK - Comcast/Xfinity Mobile Campaign* | May 2023 – December 2023

- Provided bilingual technical support by troubleshooting connectivity and system-related issues, documenting and tracking support tickets, and clearly communicating technical solutions to users .

Projects

Academic Management System Modernization | *DEGT - UNAH*

- Developed and implemented Front-End features using Angular and TypeScript.
- Integrated with backend services through REST APIs, implementing Angular services, route guards, and HTTP interceptors to manage requests, navigation, and server communication.
- Performed functional and component testing to validate module behavior and ensure proper functionality before handing off code to the testing team.

Inventory Management System | Department of Physics - UNAH

- Developed the Front-End of a web-based inventory management application for the UNAH Department of Physics.
- Implemented user interfaces using React and integrated them with backend services developed in Python and PostgreSQL.
- Contributed to development under the Scrum framework, working in two-week sprints and collaborating with the development team.

Education

- B.S. in Systems Engineering | National Autonomous University of Honduras (UNAH)
- Introduction to Java Programming | INFOP
- English Intermediate 3 | INFOP
- Python Programming | INFOP
- MySQL Database Fundamentals | INFOP

Languages

- Spanish: Native
- English: B2
